LUVUYO COLLEN MNGUNI

IT Operations & ERP and CRM Application Support Specialist | AWS SysOps Engineer

Roodepoort, Gauteng | 068 289 8792 | mnguni.luvuyo@gmail.com | linkedin.com/in/luvuyo-mnguni-80414438 | luvuyo-mnguni-tech-ops.netlify.app | github.com/vmnguni

PROFESSIONAL SUMMARY

SysOps Engineer and IT Operations Specialist with hands-on expertise spanning cloud infrastructure, technical and application support, and IT service management (ITSM) in multinational environments. Reduced AWS non-production runtime by up to 99.8% and delivered approximately 40% in monthly cost savings through AWS Lambda and Amazon EventBridge automation, RDS scaling, and Auto Scaling Group (ASG) instance scheduling across 26 cloud environments. Provided Tier 1 to Tier 3 technical support and incident resolution under SLA pressure, backed by a strong ITIL foundation spanning Incident, Problem, and Change Management, Root Cause Analysis (RCA), escalation management, and service desk operations, with hands-on support experience across Salesforce CRM, Amazon Connect, AVAYA, and Remedy ITSM (BMC). Brings a decade of enterprise ERP and business-systems support (NICOR, MDA, SAP) and IT business analysis experience prior to specialising in cloud operations, including end-to-end procurement workflow and lease approvals workflow support across banking, accounts, finance, procurement, leasing, accounts payable, and accounts receivable departments. Independently learned Grafana and built a CloudWatch-integrated monitoring dashboard from scratch, including IAM-based data source configuration and custom panel visualizations for key AWS infrastructure metrics. Developed a self-service ITSM portal that reduced repeat incidents and improved knowledge base quality across a 6-country operation. AWS Certified Cloud Practitioner (valid to September 2027) and Oracle Fusion Cloud Applications ERP Process Essentials Certified (Rel 1); 13+ years of total progressive IT experience; currently completing a BSc Honours in Computing through UNISA, expected 2027.

CORE COMPETENCIES

Technical & Application Support · Service Desk & Ticketing (ITSM) · AWS Cloud Infrastructure · Oracle Fusion Cloud Applications (ERP Process Essentials Certified) · Kubernetes (Amazon EKS) · Identity & Access Management · Cloud Automation (Lambda, EventBridge) · RDS Scaling & Auto Scaling Groups · CloudWatch Monitoring & Alerting · Grafana Dashboarding · Incident, Problem & Change Management · Root Cause Analysis · SLA Management · Escalation Management · ITIL Service Delivery · ERP Application Support · Business Requirements Analysis & UAT · Knowledge Base & Documentation · Disaster Recovery · Cost Optimisation · External Vendor & Partner Coordination · Cross-Functional Stakeholder Engagement

TECHNICAL SKILLS

- **ITSM & Service Operations:** Incident, Problem & Change Management, SLA Management, Root Cause Analysis (RCA), Tier 1 to Tier 3 support, ITIL, escalation management
- **ERP Systems:** NICOR, MDA (application support, configuration, issue investigation and troubleshooting; end-to-end procurement workflow and lease approvals workflow support across banking, accounts, finance, procurement, leasing, accounts payable, and accounts receivable departments); SAP (access and onboarding)
- **Enterprise Systems & Platforms:** Salesforce CRM, Amazon Connect, CRS+, AVAYA, Moodle
- **ITSM Tools & Collaboration:** Remedy ITSM (BMC), Jira, Confluence, ClickUp, GitHub, Slack
- **Cloud Platform (AWS):** Amazon EC2 (AMI management, Launch Templates), Amazon RDS (scaling and performance tuning), Amazon S3, IAM, AWS Lambda, AWS Organizations (multi-account setup), AWS CodeDeploy
- **Container Orchestration:** Amazon EKS (Elastic Kubernetes Service) cluster patching and maintenance, node group AMI updates, node instance right-sizing, add-on management (Amazon EBS CSI driver), Kubernetes version upgrades
- **Automation & Infrastructure as Code:** Event-driven automation (Lambda/EventBridge), Terraform deployment pathways, GitHub repository administration, RDS scaling and ASG instance scheduling
- **Monitoring & Alerting:** CloudWatch dashboards and alerting, Grafana dashboard development (CloudWatch data source integration, IAM role configuration, panel visualization design), Slack incident notification integration, proactive incident detection
- **Infrastructure & Systems:** Linux patch management, disaster recovery (DR), compliance management, cost optimisation, IT audit support (access controls, change controls)
- **Data & Reporting:** SQL (SELECT queries for data extraction and reporting support)
- **Professional Skills:** Stakeholder engagement, technical documentation, cross-functional collaboration, business requirements analysis, UAT, user training, vendor management

PROFESSIONAL EXPERIENCE

AWS SysOps Engineer | Valenture Institute *January 2025 – Present*

- Administer, secure, and optimise AWS cloud infrastructure (EC2, RDS, S3, IAM, Lambda, CloudWatch, EventBridge) across 26 environments supporting UCT Online High School, an ed-tech platform serving thousands of students.
- Reduced AWS RDS non-production runtime by 99.8% (from 744 to 1.33 hours/month) by designing event-driven automation with Lambda and EventBridge, removing manual start/stop processes.
- Engineered weekday-only RDS scheduling (06:00–18:00 SAST) for Dev and QA environments, cutting runtime by 70% and contributing to approximately 40% monthly cost savings.
- Configure RDS scaling activities and Auto Scaling Groups (ASG) to schedule and adjust EC2 instance counts in line with demand, optimising compute capacity and cost efficiency.
- Perform monthly patching and maintenance on Amazon EKS (Elastic Kubernetes Service) clusters, including reviewing and applying new AMI release versions across node groups, right-sizing node instance types to match performance capacity, updating cluster add-ons including the Amazon EBS CSI driver, and upgrading the Kubernetes version to the latest available release.
- Designed a CloudWatch monitoring, alerting, and dashboarding framework with Slack notification integration to enable proactive incident detection across business-critical platforms.
- Independently learned Grafana through investigative analysis with no formal training, building a monitoring dashboard from scratch: configured an AWS IAM role and connected Grafana to CloudWatch as a data source, then created panel visualizations for WAF Blocked Requests, RDS read/write latency, RDS database connections, RDS CPU utilisation, and CPU utilisation across all EC2 instances.
- Execute system patching, version upgrades, and compliance management across all 26 cloud environments in line with security and operational standards.

- Govern SaaS service reviews, compliance audits, vendor assessments, supporting business continuity.
- Act as escalation point for complex cloud and infrastructure incidents, coordinating with engineering and DS&T Software Engineering teams through to resolution.
- Maintain technical documentation, operational runbooks, and SOPs, and deliver staff training on cloud systems and IT processes.

Key Achievements

- Led infrastructure delivery for ATI (Academy of Technology and Innovation), a new online school launched alongside UCT Online High School, establishing dedicated AWS Organization Dev and Production accounts and building a Terraform deployment pathway.
- Coordinated with external development partner Silicon Overdrive on architecture, access provisioning, and permissions, and created and managed GitHub repositories with external architect access for ATI Dev and Production environments.
- Developed an AWS funding implementation proposal and needs analysis framework, and validated deployed infrastructure (EC2, ASG, CodeDeploy, RDS) post-implementation to confirm environment readiness.

System Administrator, FUSE Team | TransUnion *June 2022 – January 2025*

- Delivered Tier 1 to Tier 3 systems administration and application support for global voice operations across 6 countries: USA, Costa Rica, India, South Africa, Philippines, and Colombia.
- Administered and troubleshot AWS EC2, Amazon Connect CCP, Salesforce CRM, AVAYA, Buster, and CRS+ across multi-region environments.
- Owned incidents and service requests end-to-end in Remedy ITSM, maintaining SLA compliance and performing Root Cause Analysis on recurring issues with preventative action.
- Managed end-to-end user onboarding, access provisioning, system permissions, and database privilege assignment across all platforms.
- Served as second-level escalation point for incident and service request management, coordinating with internal engineering teams and third-party vendors.
- Developed and documented operational processes and procedures, establishing consistent multi-level support protocols across global teams.

Key Achievement

- Developed a self-service ITSM portal integrated with Remedy using embedded FAQs and troubleshooting guides, automating ticket creation and standardising submissions across 6 countries, which reduced manual support workload.

IT Business Analyst | Excellerate Property Services *May 2012 – May 2022*

- Progressed from second-line support, to a systems analyst, to hybrid IT Business Analyst over 10 years, supporting enterprise systems and driving process improvements across a large multi-branch property management organisation.
- Provided L1 to L3 application support for ERP systems (NICOR, MDA) and SAP (junior) across multiple business units, investigating and troubleshooting functional and technical issues to resolution.
- Supported the NICOR procurement workflow end-to-end, covering order creation, attachment verification, goods received note (GRN) processing, partial and full receipt handling, and invoice matching through to completion, working closely with buyers, order administrators, and accounts payable.
- Delivered new user training on NICOR ERP, with particular focus on the procurement workflow, from order creation through to invoice processing.
- Supported the NICOR lease approvals workflow end-to-end, covering application processing, credit vetting, lease approval, exception approvals, offer letter issuance and acceptance, and lease verification, working closely with lease administrators, credit analysts, portfolio managers, and portfolio executives.
- Provided cross-departmental ERP support across banking, accounts, finance, procurement, leasing, accounts payable, and accounts receivable functions.
- Administered user onboarding, offboarding, and access administration across SAP, SAP B1, and ERP systems (NICOR, MDA).
- Analysed and documented business requirements and conducted UAT and functional test scenarios ahead of go-live deployments.
- Acted as liaison between business units, IT teams, and external vendors, translating operational requirements into technical solutions aligned to business needs.
- Coordinated incidents and service requests against SLA targets, supporting DR testing, vendor management, and post-incident reviews.
- Served as the primary point of contact for external IT audit firms conducting audits on Access Controls and Change Controls across NICOR, SAP ERP, and MDA, ensuring documentation and evidence met audit requirements.
- Acted as the designated Disaster Recovery owner for NICOR, supporting DR audit reviews and ensuring DR documentation and processes remained current and audit-ready.
- Extracted data using SQL SELECT queries to support management reporting and data-driven decision-making.

Key Achievements

- Led enterprise document migration to a new intranet platform, recreating folder structures and configuring department-specific access controls, with zero business disruption and full data integrity.
- Coordinated the implementation of automated tenant statement email distribution via the NICOR ERP system and SMTP integration, eliminating all manual distribution processes.

EDUCATION & CERTIFICATIONS

- BSc Honours in Computing, University of South Africa (UNISA) — In Progress, Expected 2027
- Advanced Diploma, Information Resource Management, UNISA — 2021
- National Diploma, Computer Systems Engineering, University of Johannesburg (UJ) — 2014
- AWS Certified Cloud Practitioner, Amazon Web Services — Issued 2024, valid until September 2027
- Oracle Fusion Cloud Applications ERP Process Essentials Certified, Oracle — Rel 1, Issued September 2026
